PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	Generally the paper raise an interesting and relevant issues. However, since this paper is based on secondary data it needs a strong analysis and argument to show the importance of the paper. There is no need to spend a lot of time defining a concept and giving an example for each concepts. For example under sub title Natural resource, The scope of Natural resource management and policy, lots of definition and examples are given. Instead it will be good if the author bring relevant examples on Nigeria. Review what other researchers wrote before you on the existing situation. That way it will give for the reader better information. Therefore Introduction part and the other subtitles needs a revision. In addition the author did not mention the kind of methodology used to prepare the paper. It is also good to insert location map so that the reader will have a better idea when some examples are cited in the paper. ***NB Please refer the document for detailed comments.**	NOTED
