SDI Review Form 1.6

Journal Name:	**American Chemical Science Journal**
Manuscript Number:	**2014_ACSj_14764**
Title of the Manuscript:	**Photocatalytic degradations of malachite green on magnetically separable Ni1-xCoxFe2O4 nanoparticles synthesized by a hydrothermal process**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	Page 2 line 29, please check the word nanio or nano This paper focuses on the concentration of Co addition, but there is almost no explanation of Co material in introduction section. Please add it. This study showed us many properties of the photocatalyst were enhanced with increase dosage of Co. How about its best dosage? How about when comparing with other nanoparticles?	
Optional/General comments
