SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_33166
Title of the Manuscript:	MODULATORY ROLES OF CLOVE AND FERMENTED GINGER SUPPLEMENTS ON LIPID PROFILE AND THYROID FUNCTIONS IN HIGH FAT DIET INDUCED INSULIN RESISTANCE RABBITS
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The text still has many misspellings. Soon in the abstract i already perceives SERA instead SERUM; FRIDEWALDTAL? OBSERVE instead of OBSERVED in line 261. There is more error in line 276 ... line 302..Insum, the text needs a careful grammar revision. The summary conclusion is very general and does not report anything: ***ameliorate alterated physiologic paramwters.*** VERY IMPORTANT: THE STUDY CONTINUES WITHOUT THE APPROVAL OF THE COMMITTEE OF ETHICS. In the statistical analysis, to say that glucose was presented in mg / dl and as mean ± SEM is a profound misconception. The unit of blood glucose is not a statistical procedure; And if it were, the authors would have to inform the units of the other variables. There are semantic and translation errors in English in the new first paragraph of the results. Table 1 is now being called in the text twice. In addition to redundant, it leaves the text confusing. The information in the tables continues only after they appear in the text. What information do you want to convey in the first paragraph of the discussion? There's a lot of information there so many information for a single paragraph. I stress that the text needs a thorough grammatical and semantic review.
