SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**Consider using spent oil in place of oil in the title and body of work to give a clear idea of the type of oil used in this study.**	
Minor REVISION comments	Results in Fig. 2 can be better displayed using table since values for cobalt, nickel and manganese are close to 0. In fact the plot for nickel was swamped by cobalt and manganese. Check and reconcile between manganese in Fig. 2 and magnesium in line 214.	
Optional/General comments
