SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	* It is understood that the study uses time-series methodology. There are technical terms that can be found in the discussion of results. Suggestion: It is encouraged to contextualize these findings by discussing it "on common parlance". This will connect the statistical analysis and the situations "understandable by common readers". * Provide elaborate discussions on the trend, pattern and seasonality of the prices and volume of vegetables.	This was amended, whereby common terms were used to aid with the comprehension of the statistical analysis and situations.
Minor REVISION comments	* Enhance discussion of findings by adding literature as support. * Citation of authors of some statistical methodology in the Method and Results are necessary to be reflected at the end of the statement.	This was done, as six more relevant literature references were sourced and added to the article.
Optional/General comments	* Improve the format and placement as well as the pixel quality of the equations and formulae used under Method.	This was done.
