SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**In this article, abstract should be replaced with other, more specific to the research.** **English have to be improved, because some parts of manuscript are incomprehensible for readers.** **It is necessary to improve the quality of English in this article. Several sentence are incomprehensible for potential readers.** **Abstract is not adequate for the manuscript. In abstract are present the general data about the recultivation, while in manuscript we have a specific location, with specific problems, with results of analyses…**	
Minor REVISION comments	-	
Optional/General comments	Reading the abstract, I thought that it was review paper, but now it is clear that authors described the recultivation process with technical data during the recultivation. I m not expert for technical part of recultivation. I m hoping that other reviewer(s) can be able to estimate the technical properties of recultivation process.
