SDI Review Form 1.6

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	**Ms_AJEE_41004**
Title of the Manuscript:	**Removal of heavy metals Cd (II), Fe (III) and Ni (II), from aqueous solutions by natural (clinoptilolite) zeolites and application to industrial wastewater**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	1. Careful review through the text. Sometimes authors refers adsorption, others absorption. 2. Rewrite titles in Table 1 and 2. 3, Units are not properly written. 4. Ni removal % in Figure 3 does not correspond to those observed in Figure 2. 5. X- labels in Figures 3, 4, and 5 are not clear. 6. In section 3.2.5 the text is not referred to Figure 4 but Figure 6. 7. Figure 7 is not biosorption. 8. In lines 291-293 if a chemical equilibrium is reached (or saturation of the active sites), then it is not a mass transfer problem. Otherwise, authors must clearly explain this statement. 9. Line 297 does not refer to any Table nor Figure. 10. Sentence in line 305 contradicts what it is observed in some Figures, where it is clear that Fe has more removal %. 11. In Table 4 is not well-defined what is inlet and outlet. 12. X-label in Figure 8 does not correspond to the Figure. 13. Section "Application test on industrial wastewater" is not clear what authors try to explain. It must be totally rewritten.	The correction applied to the manuscript Thank you for advice
Minor REVISION comments		
Optional/General comments
