SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	**Asian Journal of Environment & Ecology**
Manuscript Number:	**Ms_AJEE_43918**
Title of the Manuscript:	**The full hierarchical structuration of species abundances reliably inferred from the numerical extrapolation of still partial samplings: a case study with marine snail communities in Mannar Gulf (India)**
Type of Article:	**Original Research article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
The title of the first column of the table is missing. In fact I even tried to add columns to help you complete, but you do not understand. The title of a table corresponds to the first row and the first column (Ex: for your 1st table: characteristics of communities) As for the references in the conclusion section, the reasons given by the author for not deleting them are not convincing. Conclusion should not be discuss Conclusion: it is not a review manuscript, which can have many figures and tables and does not meet the standards of a research article.	**OK modifications are provided accordingly, underlined in green**
