Journal Name:	**Asian Journal of Environment & Ecology**
Manuscript Number:	**Ms_AJEE_39304**
Title of the Manuscript:	**A Study of Cyclists Activity Involvement, Place Attachment, Satisfaction and Loyalty**
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	My general review of the paper is that a bit more work is needed before I can recommend publication. The authors failed to insert p-values or significance in the paper in the abstract and results. The author/s describes the method of data analyses but not their findings with statistical significance. The discussion is needs more work. The author/s need to compare their findings to present literature. Finally the paper needs to be sent for English language editing. The paper has six objectives, which is a bit to much. I recommend it should be reduced to 2 or 3 for this manuscript and use the others for subsequent papers. I recommend that the author/s consider these recommendations and address them.	
Minor REVISION comments		
Optional/General comments
