PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**1) Better than first version but still many grammatical errors, some of which I have noted. Correct these and have an English major carefully go over and make corrections that I missed** **2) As noted in my comments, the solutions are much more complicated than just environmental education. The author(s) need to discuss these shortcomings in detail and make recommendations as to the way forward.**	
Minor REVISION comments		
Optional/General comments	I believe this paper could play an important role in sensitizing stakeholders as to the issues that must be addressed to make conservation work in and around not only Rungwa Game Reserve, but across Africa. This will require the authors to enter into a much more detailed and comprehensive discussion of the issues.
