SDI Review Form 1.6

Journal Name:	**British Journal of Pharmaceutical Research**
Manuscript Number:	**Ms_BJPR_30974**
Title of the Manuscript:	**Insights on the Infrared Spectrum, Phytochemical and antibacterial activities of Calotropis procera Leaf extracts against vancomycin and methicllin resistant bacterial isolates**
Type of the Article	**Original research Paper**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	The manuscript presents few modifications to perform.	Ok.
Minor REVISION comments	The author best describes the obtaining of the bacteria studied. It is not clear from where they were obtained as strains.	The bacteria were obtained from wound in hospital patients and tested against vancomycin and methicillin. The resistant bacterial isolates were further subjected to the crude leaf extracts and purified extract to see the susceptibility of these isolates and the inhibitory effect of these extracts of *Calotropis procera* in the preliminary treatment of wound infection.
Optional/General comments	The manuscript is well conducted. With a logical development of ideas.	Thanks. I really appreciate your review and time rendered to this manuscript.
