PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
Use SI nomenclature i.a with a space between numerical value and unit, e.g 168.90 mm https://www.bipm.org/en/publications/si-brochure/section5-3-3.html **There are still many language and formatting errors, including multiple misuses of singular and plural of verbs. Some examples of edits preceded by line number:** **52 Modified Kostiakov** **58 State which** **86 because they are** **135 infiltration was compared** **147 predicted the cumulative** **The references still need careful review. Reference 3 is very vague with no author given. In line 48 no reference number is given for Ogbe et al which does not appear in the reference list. In line 74 probably Lewis is missing before [15]. Reference 18 appears in the list but not in the text. Although not compulsory, the recommenced DOI references are absent even though DOI exists for instance for reference [1]. There are no web references.**
