SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	The manuscript is an interesting study investigating the deleterious effects in liver of rats by ingestion of monosodium glutamate Although the authors said differences are significant with control (lines 120-122 and 159ñ160), data weights of the animals are not shown. The statistical treatment of the data is not clear. In the legend of Table1 superscripts a, b and c are not well specified. For example: According to the legend, values shown for 1st are not significantly different, and it is not in agreement with the text of the Results (lines 223-225).	
Minor REVISION comments		
Optional/General comments	The manuscript is suitable for publication after Major modifications and corrections.
