SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Research in Biochemistry
Manuscript Number:	**Ms_AJRB_42223**
Title of the Manuscript:	**THE EFFECT OF PROTEIN TYROSINE PHOSPHATASE 1B INHIBITOR ON GLUCONEOGENESIS INVITRO**
Type of Article:	**Original Research Article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
The title should be revised to "An experimental model of hepatic steatosis with lipid over accumulation *in vitro*" according to the aims. Then the contents should be revised, because of losing the data about PTP1B inhibitor and gluconeogenesis.	"Effect Of Protein Tyrosine Phosphatase 1b Inhibitor On Gluconeogenesis Invitro" is the final aim of the whole project. In the scope of this small paper, the data about PTP1B inhibitor and gluconeogenesis are still under checking. So, the author agreed to change the title of the paper, based on the proposed title of the evaluator: **"An experimental model of hepatic steatosis to detect lipid accumulation"**
