Compulsory REVISION comments		
Minor REVISION comments	This paper studies the relation among AGDP and factors DDST, DDSP, and INR etc. The study has practical meaning for improving agricultural output growth in Nigeria. Like similar studies, this empirical study uses a modifying model of Ogunbiyi et al. (2015) and common research methodology, where a series of tests (OLD, AFT, J co-int, VECM, Gran C.), based on statistics, are widely used in data estimations. The findings of the paper might be helpful for policy recommendations. Summing up the above, this paper is accepted to publish. To improve the state in a more concise form in Abstract, Background, and Literature Review is encouraged.	OK
