SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	In the equation related to the return on assets there are some explanatory variables that are not significant at the 5% level such as FXDEV, OPT and SWP . the same are also in the second equation the return on capital: LROCE,FUT. OPT, and SWP. You might make another estimation without one or more of these variables and see in there is an improvement in the results. You may be able to find which one of these has no effect and which one is a good determinant of the return on assets and return on capital	Point noted: but do be informed that the presence of these variables leave little to the error term. Duly corrected and highlighted in yellow
Optional/General comments
