SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	What is the limitation of this study? Your conclusion should agree with your methodology for example you did not check for other agents of hepatitis in your study and you excluded patients with chronic hepatitis; how then did you conclude that Hepatitis B virus is the commonest cause of chronic hepatitis in Sudan? What is your conclusion on the impact of hepatitis B viral infection on the hematologic parameters of infected individuals? Please clarify the ethical issue: State Ethical clearance received from appropriate authority	
Minor REVISION comments	**Abstract:** Line 2: Change 'responsible of' to 'responsible for' Line 3: ''Change that affect metabolism throughout the body'' to ''That affect general body metabolism'' **Introduction:** Other typographic and grammatical errors should be corrected. This could not be done in the manuscript because the document is in the pdf format. Page 8: Change 'discution' to 'discussion'	
Optional/General comments
