SDI Review Form 1.6

Journal Name:	**British Journal of Applied Science & Technology**
Manuscript Number:	**Ms_BJAST_31374**
Title of the Manuscript:	**OPTIMIZATION IN THE COMPUTATION OF DIELECTRIC CONSTANT OF METHANOL USING DEBYE RELAXATION METHOD**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	• The authors should check the equation in line 114, • Table 2: title should include relaxation frequency , f. • The authors concludes that the dielectric constant was highest at 0.05GHz and 10oC. What happens to the dilectric constant at 10oC and frequencies lower than 0.05GHz??	
Optional/General comments
