	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The results of present manuscript are pertinent. Standards assays methods were utilized.** **I felt lack of a better interrelation between inummo system and moderate exercise because it is known that the inummo systen have a significant role in intense having exercise. But, in moderate exercise this issue still little addressed.** **Thus, I suggest only reinforcing this interrelation in introduction and discussion topic.** **However, despite that little revisions needs I recommend the publication of this manuscript in Cardiology and Angiology: An International Journal.** **Ethical issue:** **The study was approved by ethical committee of Institution.**
