PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
- The background regarding the methods for the determination of ibandronic acid is still not in enough detail. **- The paragraph added as a discussion section does not discuss the primary findings/results of the study. It rather gives general knowledge about ibandronic acid. Therefore the discussion section is still missing.** **- I regret to say that revisions are not satisfactory.** **- A rewriting of the article is necessary.**	**Checked and changed** **I have Improved** **Rewrite some Para of paper**
