Type of Article:	**Original research papers**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
The following suggestions is made again, because the authors did not change the suggested changes: • **Introduction** I suggest writing the second paragraph followed to the previous paragraph. • **Please, clarify the objective of the study. I consider that it is not well expressed. Replace the word *form* for develop.** • Please, define acronyms *NGOs.* **Line 42:** I suggest replace the word bromatology for nutrition. • **Why the authors did not named fuel factor of food as *Atwater factor? Justify.*** • Line 132- 134: it is not important the definition about *health. Please, remove it and use an appropriate reference!* • The authors said that: *Is there any law to become a book not suitavble for using in reference section.* **I think that is not the way to answer a suggestion. I suggest being more polite. It is more appropriate for a manuscript a paper than a book.** • I consider that the manuscript has a lot of references. Please, review the references and use the most significative. This version has 97 references!
