PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	The data presented in the manuscript number CJAST_42601, reveal the low presence of BIR in the areas tested and therefore the low probability of contracting pathologies related to the exposure of ionizing radiation and petroleum products. The results obtained by the authors therefore have a purely observational value of the data. The manuscript can be accepted with small corrections requested to the authors: - some sentences are not complete - the used English is not always correct, - there are formatting errors in the bibliography, - - fig.5 presents some numerical superimpositions which confuse the reported data - there are many typos in the text	THANKS FOR YOUR CORRECTIONS. ALL THE CORRECTIONS HAVE BEEN EFFECTED.
Optional/General comments
