Editor's Comment:

Decision for manuscript number Ms AJEA 29333entitled 'Screening of maize (*Zea mays* L.) genotypes for adaptation on contrasted acid soils in the humid forest zone of Cameroon' written by Petmi CL, NgonkeuELM, TandziNL, Ambang Z, Boyomo O, bell JM, Tekeu H, Mafouasson H, Malaa D, andNoé W

Following evaluation of all documents related to the manuscript I agree with Reviewers that the manuscript is acceptable for publishing in Journal of Experimental Agriculture International.Although, the manuscript is improved comparing to the original submission,it still needs correction.

1. Key words must be changed because they should not be the same as words used in a title. Currently some keywords are the same as words in the title.
2. Equations from subsection 2.5 disappeared from the last version of the manuscript.
3. Figure 2 is missing.
4. Figure 4 is missing.
5. Figure 5 is missing.
6. List of references is prepared not according to the Journal requirements.

General advice. The last version of the manuscript is prepared in messy way. It is prepared worse than the previous version. The manuscript should be prepared with more attention and according to the Journal style.
