SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	In the first line of abstract you should start in expanded form i.e., Type 2 diabetes mellitus (T2DM) Introduction- Need to improve the writing in giving correct information regarding the role of Il-10. When you giving the short form first time, that should be expanded form.	Was done Was done Was done
Minor REVISION comments	In Discussion 2nd para- urinary albumin excretion rate (UAER) – Should change the font size	Was done
Optional/General comments	This work is very much useful to the society. Work done well But authors should read again the full paper and should check the sentences are correctly framed and giving the easy understating of the findings. At least Introduction and methodology should be rewrite. In conclusion, 2nd point need the check the wordings.
