**SDI Review Form 1.6**

**PART 1: Review Comments**

| | **Reviewer's comment** | **Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)* |
|---|---|---|
| **Compulsory** REVISION comments | | |
| **Minor** REVISION comments | **Comments about the article MS_IJBCRR_32375**<br><br>In this article, the authors deal with an important topic. Indeed, the problem of protein-energy malnutrition is present in the majority of developing countries. The search for a possible solution to improve the intake of protein of animal origin is important. The work presented by the authors is carried out in this context.<br><br>The methodology as a whole is acceptable. I would have preferred that the study included 2 lots of birds. The first batch receives the mango feed and the second batch receives a feed other than the first one with a placebo.<br><br>However, some remarks seem useful to improve the quality of the manuscript.<br>1- **At the introductory level:**<br>* I think it would be interesting that the authors present some prevalence of malnutrition (Marasme and Kwashiorkor) in Nigeria.<br><br>2- **At the level of the methodology and the results**:<br>* Authors must present the statistical software and statistical tests used for the analysis and | Actually, the control experiment had no MKCM only maize<br><br>Noted<br><br>Noted |

| | | |
|---|---|---|
| | interpretation of the results obtained.<br>* The authors have to take over and treat the presentation of Table 2 which is not very clear.<br><br>* At table 2, I think that it would be interesting to add the values of the statistical tests "p".<br><br>* At the discussion level, I also think that the authors must discuss whether the use of this method of feeding birds alone could solve the problem of insufficient consumption of protein of animal origin in Nigeria or it should be suggested Other tracks.<br><br>3- **At the References level**.<br><br>* Authors should review references 3, 6, 14 and 15. | Noted<br><br>Done<br><br>Noted<br><br>Noted |
