SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	**Ms_IJBCRR_44353**
Title of the Manuscript:	**Subchronic toxicity study on serum biochemical parameters in wistar rats of the aqueous extract of the stem bark of Sacoglottis gabonensis (Baille) Urban (Humiriaceae)**
New title of the Manuscript:	**Subchronic toxicity study of the extract of Sacoglottis gabonensis (Baille) Urban (Humiriaceae) in wistar rats.**
Type of Article:	**Original Research Article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. **TITLE** **The title is good.** 2. **DESIGN** The design is in contrast to the results (Line 10- 11, and line 68). The design shows that male and female rats were used but the present results appear to be for one sex. The author(s) still insist to present a result of an anonymous sex (male or female) which contradicts OECD guideline 408 adopted for this study as stated in line 67. This is not acceptable.
