SDI Review Form 1.6

Journal Name:	Asian Food Science Journal
Manuscript Number:	**Ms_AFSJ_42055**
Title of the Manuscript:	**Development of a set-up for creep test of biological / viscoelastic materials subjected to uniaxial compressive loading.**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The manuscript needs some substantial revision. It should be underlined, that a creep experiment performed using the new device is related to bulk a particles. No any mathematical model explaining viscoelastic behaviour of material is supplied. Nonlinear regression quadratic equations curves derived for experiments as shown in figs 2-8 are wrong. The quadratic functions rise initially then decrease while experimental values never decrease vs time.**	NOTED
Minor REVISION comments		
Optional/General comments
