SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**This is a descriptive study whose design corresponds to a prospective series of cases where a group of subjects one year after hospital discharge is evaluated and described its evolution after that time. No infer causes.** **Although the results show some degree of damage 1 year after hospital discharge, the number of cases is very small and not infer whether it was the H1N1 influenza or severity of disease requiring ICU, causing the deterioration of respiratory, renal and cognitive function, independent of diagnosis.** **It would be interesting to design a case-control study for comparing ICU patients diagnosed with H1N1 and other causes at one year follow up.**	
Minor REVISION comments	**It provides useful information to generate a hypothesis study.**	
Optional/General comments	**English correction is required.**
