SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The authors declare ethical considerations; ethical approval for the study was obtained from the Hospital ethical committee. But there is few information about participants agreement.**	Each of the study participants signed an informed consent especially since blood was going to be taken for analysis.
Minor REVISION comments		
Optional/General comments	The MS title reflects the content. But as we are working on similar research, I was expecting that genetic patterns would be studied. It could be seen as perspectives of the work. The abstract is sufficiently concise and informative. The paper achieves its declared purpose describing the lipid patterns of overweight and obese adult patients in the area. The results show clarity of presentation and the paper is concise. *Authors are invited to correct BM1 on page 4, line 108 and on page 5 line 123. It should be BMI.*
