SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Many grammatically incorrect sentences in English, especially lines 19, 22-30, 39, 44, 72, 84, 98, 137, 145, 178, 191, 215, 241-244, 259-265, 269, 274, 280-281, 283, 293-296, 317 and may others. This makes the manuscript very difficult to read and to understand what the author wanted to say.	We have made all the changes that the reviewer recommended us to.
<u>Minor</u> REVISION comments	<ol style="list-style-type: none"> 1. In line 140 author states that "only one of these articles [35]..." however, the author analyses the study of von Mackensen et al. (23). Needs to be clarified or corrected. 2. In line 178 author states that patients had viral infection as a result of pharmacological therapy. It needs to be clarifies what kind of viral infection and from what kind of pharmacological therapy. 3. In line 231-232 the author repeats unnecessary information about mean age which is already described in lines 175-176. 4. In line 187 the author states "a period of 12 months", however later in lines 229 and 314 it appears a period of 12 weeks. Needs to be clarified. 	We have made all the changes that the reviewer recommended us to.
<u>Optional/General</u> comments	Because of incorrect English the manuscript is extremely difficult to understand. The issue about influence of physical therapy on QoL of patients of haemophilia is interesting and important.
