SDI Review Form 1.6

Journal Name:	**Journal of Advances in Medical and Pharmaceutical Sciences**
Manuscript Number:	**Ms_JAMPS_23533**
Title of the Manuscript:	**Multidrug Resistant Salmonella enterica strains in South Western Nigeria: Prevalence, and Susceptibility to Ceftriaxone**
Type of the Article	**Original Research Articles**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	This study involved aspects of Microbiology and hospital infection control. The manuscript is excellent, well written, interesting and important for microbiology researchers and Publics Health and Hospital managers, although there are some suggestions to be done. 1. Some of the keywords used do not follow any index descriptors in public health, as BIREME, MeSH, NLM or UMLS (eg. Antibiotics susceptibility), and they should be changed. 2. I suggest the reduction in size of the abstract, because there are so many details that I guess that they could be suppressed.	The changes has been effected The abstract has been reduced.
Minor REVISION comments	1. The topic "Materials and Methods" should get one more item (eg. "Ethical consideration").	*S. enterica* is one of the most difficult organisms to isolate in developing country like Nigeria due to drug self prescription. We made use of the isolates already collected and stored in microbial bank from each hospital during this research
Optional/General comments	This article is well written, and after the changes suggested, it's gonna be suitable for publication	Thanks.
