PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	This is an apparently interesting study since it investigates assessment of the reticular fibres on cadmium induced liver damage following oral administration of *M. oleifera* oil and *A. occidentale* oil in wistar rats. However, in Introduction section, a clear indication of the scope of the work should be included. Additionally, no statistical analysis is stated in Materials and Methods and no statistical analysis of the results is carried out. Finally, discussion section should be more extensive.	Thank you for your comment; we have done all the necessary corrections.
