SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	1. The recommendation regarding the use of bacteria name, it should be following on taxonomy/nomenclature. This includes also the abbreviation of bacterium.	That is noted
Minor REVISION comments	1. Please be consistent with the number of decimal. One (1) or two (2)? 2. In line 193: It should be better "No isolated (%). 3. Table 2: There should be added an explanation of 1, 2, … etc. in part of legend to facilitated the reader understand.	This is noted and correction effected
Optional/General comments	This paper studied resistance to various antibiotics from wound samples. Although, many articles that discuss the observation of antibiotics resistance have been published, the result of this paper presents the benefit for community and clinicians who treated patients. The article has some good ideas and well-constructed.
