SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	**Ms_IJTDH_28019**
Title of the Manuscript:	**IMPACT OF REFUGEES AND INTERNALLY DISPLACED PERSONS ON INTERNATIONAL HEALTH**
Type of the Article	**Minireview paper**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
You added what I wrote under my review… where is the citation? Information for Class A is duplicated in the paragraph. Where did you get the definitions for Class B1, B2 and B3? They are all wrong… Class B1 is TB clinically active, suspicious chest x-ray with negative cultures or extrapulmonary TB…. Class B2 is Latent TB Infection and B3 is a contact with a known TB source case. That information definitely is NOT on those references that you are listing (33-38). *Class A people are those with health conditions of public health importance which makes them inadmissible, while Class B are those that may be admissible but may require comprehensive medical care and follow up. Class A is an inadmissible condition of public health significance that might be an infectious disease or a mental disorder with associated harmful behaviour. Class B means that immigrant needs follow up after arrival at the border. for refugees there is a travel sheet with special requirements that differs completely from these classifications. Tuberculosis have three different classifications namely B1 represents tuberculosis and pulmonary infections, B2 represents tuberculosis and extra-pulmonary infections, while B3 stands for tuberculosis and latent tuberculosis infection evaluation. These exclusively apply for the United States [33- 38].* **– Either that paragraph needs to be eliminated or provide accurate information with adequate citations.**
