Subject: Re: Request for final decision for manuscript number 2014_AIR_9685

The manuscript has improved during the last revision.

Besides typos such as pervious -> previous in Section 4.1,
the equations come without any derivation or references.

I don't know what to do with Ref [6].

Page 13: "As you see" should eventually be replaced by "As one can see".

The conclusions are weak. I wonder if Fig. 1 had been
newly created by the authors, or if they need to quote
a reference.
