	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**27.28 and 29 needs citation** **75-76: A detailed but precise information is needed on the source of data, what year are you referring to? Did you use all the 14512, or is this a subset of the original number of households in the RIGA database. Please state. If possible describe indicators/variables used in this research.** **79-115: Any reference to where you got the equation from?** **Line 146: please explain the result in Table 2. It simply shows variables that predict the likelihood of participation of household in off-farm activities, Plus it should form a part of your policy recommendation. This is also important for further/future research.**	Citations have been included The concern has been clarified. The source of the PSM equation has been included. The result is not explained because is only a means to achieving the propensity scores needed in the matching process. This is clearly explained in line 148 – 150.
