SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	Seems like a postgraduate dissertation work had been submitted for publication. Major organisation necessary in terms of text and sentences arrangement with use of scientific English language. Quote references at the end of each sentence throughout manuscript text Clarify and define objectives Focus and discuss on achievement of objectives drawn from results analysis Age and gender distribution graphs-provide Cite references in order in manuscript body text Improvisation in English-necessary	Thanks for the review . Will submit revised manuscript with suggested corrections
Minor REVISION comments	Methods 1. Place of study-private or government 2. Are these patients newly diagnosed or already on anti glaucoma medication before SLT and if yes how many-clarify 3. Exclusion and inclusion criteria-mention 4. Line no. 13-14 are the results of the study	Government hospital. Centre for excellance in north India

	Results 5. Define failures Conclusion 1. Was there failure of mtmt (maximum tolerable medical therapy-if yes define indication of adjunctive treatment with SLT Keywords- correct key words-mention Introduction 1. Line no. 43, 64, 69, 70-reference quotation at end of sentence 2. Introduction is lengthy-diagrammatic representation unnecessary, 3. Authors should include outcome of POAG treatment by SLT as adjunctive from available published literature 4. Define study objectives-if it is first of its kind in India-say so. Rationale of study 1. line no 82-83- still investigating for SLT induced IOP reduction in Indian eyes Materials and methods 1. inclusion and exclusion criteria-configure in sentences 2. was ethical clearance obtained	

	Results 1. include mean age and gender distribution 2. IOP level in failed cases-how much 3. How many topical anti glaucoma agents used prior to study initiation Discussion 1. Is study comparative-line no.-155-157 2. Authors should discuss field changes for study patients with IOP of 23.78 mm Hg And why they considered these patients for adjunctive treatment-was there field progression in these patients who were already on topical anti glaucoma agents-all these points authors should clarify and discuss 3. Line no-160-what is 26, 60 4. Line no 162-should clarify in methods section 5. Line no. 163 -Failure of MTMT may be considered as an indication for adjunctive treatment such as SLT-is it so in present pilot study Sub groups analysis should be shown in results section 1. Abbreviation should be expanded for better understanding Effect of nature and number of topical drugs 1. Now authors explaining on number of anti glaucoma drugs used preoperatively	

	2. Quote references in order as they appear in reference section Table 1 1. needs proper formatting 2. Most of table 1 content recapitulated in discussion-as for as possible avoid 3. Table foot notes should be provided for abbreviations used Limitations 1. Now author telling about number of eyes-line no. 257	
Optional/General comments
