SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The description of this case is very superficial. What was the exact visual acuity in both eyes? Hand movement or no light perception? Was the "corneal opacity" diffuse, or central? What about the eyelids and conjunctival fornices? A photograph is also required. What is the concentration of alcohol in this perfume? It is hard to see that a common perfume can cause full thickness, diffuse corneal scar. Was it a large amount of the perfume or just one puff? What was the result of follow-up? Was keratoplasty performed in the long-term period?	
Minor REVISION comments		
Optional/General comments
