SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	This was an excellent report on very thorough research. The literature review was thorough; the methodology was painstakingly thorough and incorporated the use of sufficient numbers of samples in dust size analysis and explosion tests. It is comprehensive and completely justifies the authors‟ recommendation **n/a** 1. **: **Ndoh M.I**, Bitondo D, Balgah RA (2016). Climate Variability and Change in the Bamenda Highlands of North Western Cameroon: Perceptions, Impacts and Coping Mechanisms. British Journal of Applied Science & Technology, 12(5): 1-18	
Minor REVISION comments	For L13-16: ……. farmers perceive climate variability to be caused by anthropogenic factors (….%) and spiritual forces (….%) For L16, let readers know the level of test. For example, you may say, "at the 6% level, the regression model indicated a significant …. Between … and …..(p=.05) Discussion of results could be richer if author tries to link	

	his findings with those obtained elsewhere. For example, at the end of L198 author could say, "similar findings had been reported elsewhere (e.g. Ndoh et al 2015**,….,….).	
Optional/General comments	n/a
