Title of the Manuscript:	**The impact of information and coordination innovation on relationship and firm performance: The case of small and medium enterprises in Indonesia**
Type of the Article	**Original Research Article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Abstract.	
Acknowledging the essential role of small and medium enterprises (SMEs) for empirical evidences economic growth indicates that networking among SMEs with business partners becomes a determinant factor for improving growth.	
Too big and confuse, full of grammar mistakes.	
Since information sharing and coordination innovation possess a significantly positive influence in improving the growth of firms among the channel members,a few empirical evidences have been found on the effect of information and coordination innovation in lending on the relationship performance between SMEs and financial institutions(bankings) that led to SMEs' growth.	
Too big and confuse, full of grammar mistakes.	
relationship performance or relationship commitment?	
Indonesia, which in turn contributed to economic growth.	
The authors really do not know. Because the country survey has specific characteristics that others countries (mostly involved in agro-based activities and are located in rural areas) around the world do not have, and the contrary is the same. Do not generalize your results.	
Introduction	
1.2 SMEs in Indonesia	
According to BPS – what is BPS?	
1.3 Objective of the Study	
the objective of the study was to examine the	
change to IS	
the objective of the study was to examine the impact of information and coordination innovation in lending on the relationship performance between SMEs and financial institutions (bankings) that leads to the growth of SMEs in Indonesia.	
It is not your main objective. This is the effect of your research. Please remove it.	
Literature Review and Conceptual Framework	
capital needs of SMEs hada significant customers' satisfaction	
Conceptual Framework	

SDI FINAL EVALUATION FORM 1.1

Your framework is based in three elements:
Information and Coordination Innovation on Performance
Relationship Performance
Firm Performance
So, why do you put a section of Theory Background to explain it. Please remove this section and explain your framework better. To me the framework and its Figure – number 1 seems are thrown into the text, without any concern. It is your valuable part of your job, take care of your framework.

Research Methodology
as well astypical - *grammar mistakes.*

Data Analysis and Findings
Where is the measurement of Independent, Mediator, and Dependent Variables? You only did the Cronbach's alpha measure. To analyze the Independent, Mediator, and Dependent Variables measure you have do conducted ANOVA analysis. It is used to analyze the differences between group means and their associated procedures (such as "variation" among and between groups), in your case the groups are: Table1The number of licenced SMEs in Yogyakarta Special District Indonesia, years 2008 -2012.
Explain what are the independent, mediator and dependent variables for this research.
goodness of fit index (GFI), as well as normed fit index(NFI) approached 1 or above 0.90, only explain that your sample is relevant.

Findings

Information sharing and coordination innovation in lending → Relationship performance → Firm performance

Estimate S.E. C.R. P

Your Analysis result

Estimate S.E. C.R. P
0.370 | 0.041 | 9,098 | *** |

Your Analysis result

Sorry, but the essential role of small and medium enterprises (SMEs) in contributing economic growth is NOT evident.
