PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The author(s) tried to improve the paper but major revision is needed before the paper can be accepted for publication.</p> <ul style="list-style-type: none">• There are Tables without number• Literature review section (Research Efforts to Minimize Pollution) should be rewritten. There a lot of mix –up. The author(s) should write the work done and outcome of the past researchers.• There is poor citing of references in the paper. This should be corrected	<p>Numbers have been assigned to the tables in question. The work done and outcome of the past researchers are duly embedded in the body of Research Efforts to Minimize Pollution with APA style of referencing, and summarized in Table 4. Summary of Capture Methods From Flue Gas.</p> <p>The APA method of referencing has been used throughout the paper e.g. [10] at the end of an adopted work of a past researcher. Typographical errors in the reference section have been corrected.</p>
