

Editorial Comment:

This paper, need introduce all referee suggestions. The current version not improve all suggested aspect in the referee reports. Besides need introduce the required changes in table 1.

The compulsory reference suggested by one referee is in this address:

Crossing institutional boundaries: mapping the policy process for improved control of endemic and neglected zoonoses in sub-Saharan African

Healt policy and Planning. 2014

Author's Feedback:

Table 1 as a whole is an additional table which was not in the previous version. It is included as suggested by one of the reviewers to give a description (mean, standard deviation, minimum and maximum) of the independent variables employed in the tobit regression model.

The compulsory reference “Okello et al., 2014” does not seems relevant to our study. The article was accessed as available online and having read through, it seems not to be related to our study. But if you insist, it can be included as it does not cost anything to do that.
