

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	<u>Asian Journal of Agricultural Extension, Economics & Sociology</u>
Manuscript Number:	2014_AJAEES_12701
Title of the Manuscript:	Development & Evaluation of Amylase Rich Malted Mixes (ARMMS) to Improve the Nutritional & Health Status of Pre School Children
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The Authors did good work to revise the paper however, there is need to do statistical analysis to compare the means and determine the significant differences between the samples. Please subject to proper statistical analysis. Also the correction on the table to remove the multiple lines and limit it to 3 lines as it should was not implemented. See table 1 how I did it for you. You can as well add more facts in you introduction. Methodology: It is required you describe it so that one can as well understand it proper by reading your work alone not all the references, describing the procedure will make it clearer.	The individual score cards were misplaced after my retirement. For sensory evaluation it is not possible to do the statistical analysis. The tables were corrected as per the suggestion. Given in red colour. Added more facts in introduction with more references. Both the information as well as references is in red colour. Given little more information in Methodology, as all the methods are standard methods.
