SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The article is categorized as a REVIEW. The Journal's guidelines argues that a review paper "will not have empirical data acquired by the authors but will include discussion of papers published and data acquired in a specific area". In this case, I think that the review of empirical papers on the "Perception of Kenyan Youth towards Agriculture and Necessary Interventions" is not the main issue but the reflection on the situation and the proposals to overcome it. In fact very few cited papers address the perception of Kenyan youth itself. Thus, I strongly recommend to re-categorize the article as a "Commentary / Opinion Article"	The title has been edited from "Perception of Kenyan Youth towards Agriculture and Necessary Interventions" to "Influence of Kenyan Youth's perception towards Agriculture and Necessary Interventions"
<u>Minor</u> REVISION comments	In the abstract it is argued that: "It is estimated that 64% of unemployed persons in Kenya are youth out of which only 2% have formal education" This seems to be unclear, does it imply that they did have not even a year of formal education? Also in the abstract you talk about "The remaining over 92%". Do you refer to the 92% of the 98% who have not formal education? The 92% of what? It also felt unclear. In the abstract you argue that "The paper seeks to establish the perception of youth towards agriculture and required interventions". Given there is scarce information on this perception in the paper (rather the relating causes and problems are analyzed), I'd recommend say that you Analyze and Discuss the perception... You talk about "ICT". In the text it is not clarified what it stands for.	Corrected. See revised version.

SDI Review Form 1.6

	Could you give an equivalent of Kshs 6 billion in any international currency? (perhaps US dollar or Euros?) Finally, if the first recommendation is accepted, the title should be modified avoiding the text 'A review'	
<u>Optional/General</u> comments
