SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Article needs revision under Results and Discussion. The author need to give more details on why market chain is preferred and why vis-a-vis the age categories, education levels of different farmers, and even depending on number of livestock own.	Results and Discussion have been revised Market chain is preferred because in research area mainly people get earning from livestock production and dairy products. They also face different problems in marketing of these products.
<u>Minor</u> REVISION comments	Author to indicate when the study was undertaken in terms of month and year under Materials and Methods section.	Research study takes place from March 2011 to May 2012.
<u>Optional/General</u> comments	competing interest:- The milk supply chain is not well researched or documented under Results and Discussion. Which marketing channel is preferred by which farmers making reference to farmers' age categories, education levels of farmers and number of livestock owned?? Farmers with a certain level of education or production capacity will prefer to sell their milk through a particular market chain. If this aspect mentioned above is not addressed, I would propose a title review.	Milk supply chain observed during the research is represented in the paper. In the research area milk producers follow that chain.
