Subject: RE: Request for editorial decision for manuscript number 2014_AJEA_14920

Here is my editorial decision.

The revised manuscript should be returned to the author to fill out the column for the authors responses in the SDI review form 1.6. This column is mandatory for the author to show us that he/she has taken into consideration what the reviewers have suggested. The authors have failed to fill out the form entirely. Filling out this column is essential particularly for the review comments raised by reviewer (AM). This reviewer has done a good job, as responses the author should have filled out the column in form 1.6. The authors should have filled out the the column stating whether he/she agrees with the reviewer or not. If yes, he/she should state in the column by providing the page and line numbers in the revised version as to how he/she has addressed the reviewers comments.

I strongly suggests the authors fill out the column in form 1.6
