

SDI Review Form 1.6

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_14589
Title of the Manuscript:	The Impact of weather conditions on sorghum genotype response to anthracnose infection
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript provides important data on analysis of anthracnose caused by <i>Colletotrichum sublineola</i> in sixty-eight sorghum accessions grown either in dry or wet climatic conditions. The data presented in the manuscript are worth publishing - the only major thing I miss in the manuscript is missing information on sixty-eight sorghum accessions studied. There has to be published a list of these accessions including their basic characteristics (name, origin; results of the anthracnose tests in wet and dry conditions) in a form of a table.	
<u>Minor</u> REVISION comments	Minor grammar (formal) mistakes: Line 195: Insert an indefinite article "a" before the words "variation in susceptibility", i.e., "a variation in susceptibility" Line 197: Correct the words "a variation in susceptibility"	
<u>Optional/General</u> comments	I can recommend the manuscript for publication after a list of sixty-eight sorghum accessions investigated including their relevant characteristics (name, original, scaling of their response to anthracnose in dry and wet conditions) is added by the authors as a separate table.
