SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Overall the paper is well written and is very scientific. Literature was well challenged and cited correctly. The model doesn't have any backing theory. The author should define such theory to explain his model. All the corrected grammar is in RED. The sentence in green needs to be rewritten.	The theory backing the model is the endogenous growth theory, which shows that growth rate can be related to institutional arrangements such as financial sector reforms. But due to space, time and other constraint s of the work, the model was not captured. Interested individuals can contact the researcher.
<u>Minor</u> REVISION comments	Should check some grammatical errors and awkward sentences	Corrected
<u>Optional/General</u> comments	The author should perform correlation analysis.	Not necessary because of the nature of modelling.
