SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Yes – From a brief search on the topic under review, I found an almost similar paper written by Aniekan Jim Akpaeti “DOES FINANCIAL SECTOR REFORMS AFFECT AGRICULTURAL INVESTMENTS IN NIGERIA? A COINTEGRATION AND VAR APPROACH” published by International Journal of Food and Agricultural Economics ISSN 2147-8988 Vol. 1 No. 2 pp.13-28. The striking thing is that the methodology, the period under consideration (1970-2009) and some of the findings and subsequent discussion of the findings from the current paper are verbatim quotation of the paper cited above. Again there is another paper on the same issues which compared two sectors (i.e. Agriculture and Manufacturing), but the paper under review did not cite this. - It will be critical for the author to explain why he did not make reference to these papers and even copied information from one without credit to the authors.	The two works captured by plagiarism soft ware are mine. The paper: “DOES FINANCIAL SECTOR REFORMS AFFECT AGRICULTURAL INVESTMENTS IN NIGERIA? A COINTEGRATION AND VAR APPROACH” published by International Journal of Food and Agricultural Economics ISSN 2147-8988 Vol. 1 No. 2 pp.13-28 and this present article was to be published as a paper (article) but because of the volume and the technicalities of the present paper, it was needful that the work be separated into different articles. Also, the author did not remember to reference the already published paper in the present one since it had already been written about the same time with the published article, but was only waiting to be sent to a good scientific journal with strong econometric reviewers such as AJEA. However, it is now referenced.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
