SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Very minor comments but require the author (s) attention. Line 12 Abstract: Primary.... were Space between words: lines 22, 66, 74, 124 & 255 Delete " Only " in Lines 168,169, 174 & 233 . Only is judgemental. Change " table " to Table in line 154, 189, 227, 231 & 232 .	
<u>Optional/General</u> comments	<i>Overall the manuscript is well written and addresses a key subject. My concerns are in terms of style APH 6th Edn or another style; mixed style where year in the source is bracketed or not bracketed. The study would have been more robust with more statistical tools in addition to the Yes/No. However, the author was able to capture the reviewers' attention with excellent writing skills and therefore, the manuscript is worth public consumption. Also, the manuscript is technically sound.</i>	
ethical issues in this manuscript	Ethical issues in most studies on human subjects will always be there. However, seeking consent of subjects and abiding by the group data analysis and anonymity, I cannot complain. I am sure the author (s) did take care of that.
